## Projects

### Clubmall | E-commerce

Python,NodeJs,ReactJs,MongoDB,Docker,AWS,Firebase

Orchestrated the end-to-end development of the Clubmall e-commerce platform, leveraging Node.js for the backend and Python for web scraping tasks. Managed client communications, guided the project team, and oversaw website development from inception to deployment on AWS ECR/ECS using Docker containers.

### Sugarba | Dating-web-app

ReactJs,NodeJs,MongoDB

Developed a dating application called Sugarba.be using the MERN (MongoDB, Express.js, React.js, Node.js) stack. The app allows users to create profiles, browse other users' profiles, match with potential partners, and communicate through messaging features. It incorporates modern design principles and user experience considerations to provide a seamless and enjoyable dating experience.

### Unicorso | Educational-Website

ReactJs, HTML5, CSS3, JavaScript , Bootstrap

Contributed to the development of the Unicorso educational website by integrating the front end using React.js. Unicorso provides online courses and educational resources for learners across various subjects, aiming to make education accessible and engaging.

## Plant-Based | Lifestyle App

Node.js, Express.js, MongoDB, Firebase

Developed a comprehensive plant-based lifestyle app with an admin panel using Node.js, Express.js, MongoDB, Firebase, and CKEditor for content management. The app serves as a guide to adopting a plant-based diet and lifestyle, providing users with valuable resources, guidance, and recipes. The admin panel allows administrators to manage course materials, recipes, and user accounts efficiently.

## Dizzbe | Shopping and Entertainment App

Node.js, Express.js, MongoDB, Firebase, AWS

Developed a dynamic shopping and entertainment app called Dizzbe using Node.js, Express.js, MongoDB, Firebase, and additional technologies. Dizzbe combines the functionalities of a shopping platform with entertainment features, allowing users to upload and share videos showcasing products.
